Education

University of Washington, Seattle, WA

Master of Public Health (MPH), 2019

Certificate in Demography, Center for Studies in Demography and Ecology, 2019

Bachelors of Science (BS - Department of Psychology); 2013

Bachelors of Art (BA - Interdisciplinary of Visual Arts); 2013

Professional Experience

King County Regional Homelessness Authority – Seattle, WA | Senior Evaluation and Analytics Coordinator | Aug 2022 – Present

- Project led the 2026 Point-in-Time (PIT) Count using a novel enumeration strategy for homeless census. Working both as a planner, community partner, database management developer, analyst, research coordinator and liaison. Tasks includes research site planning and logistics, volunteer training and scheduling, providing research specific goals outlined for project documentation (IRB, Contracts such as MOUs and DSAs, manuals, and reporting). Designed agency-specific analysis research plan and reporting guidelines for numerous report products (white pages; research articles; community specific reports; project documentation for a governmental/policy audience; general public)
- Provide technical assistance and methodological consultation to government agencies, Continuums of Care (CoCs) and nonprofits, including but not limited to data requests and related database development/design for ETL to provide a quality product while minimizing data exposure. Managing weekly supervision meetings with research partners on homelessness systems evaluation and holding monthly coaching calls with other CoC's on the application of a novel PIT Count methodology. Added in the project improvement such as transition from Qualtrics and Microsoft to a Google survey web tool for data collection.
- Translate complex research methodologies into operational guidance for various intra/inter-groups (Coordinated Entry; Veteran By Name List). Conduct data requests and program analysis on service providers (population focus ranges from youth and young adults (predominantly 18 - 24), Single Adults, Families (Households with at least one adult and one child or households with only children). Assisting leadership on addressing complex societal issues such as housing and homelessness with policymakers (city, county, state, and federal), community groups, and especially with those of lived experience of homelessness.
- Develop and facilitate trainings on qualitative methods, program evaluation, data collection protocols, and research ethics for staff, volunteers, and community partners with particular emphasis of the role and relationship of government, systems, and the trauma experienced throughout working within systems to inform and change policy through data and testimony.

Trained the Ombuds group in qualitative analysis to explore their department's rich and sensitive client data independently and unbiased.

- Leads in scoping, designing, developing, and testing data products such as public dashboards, reports, and mixed method evaluations for a variety of projects exploring system or program performance and trends. Create geospatial analyses and operational mapping products using QGIS, R, and Tableau with internal and public datasets to support outreach coordination and strategic planning.

Department of Veterans Affairs | Women's Health – Seattle, WA | Project Manager/Mixed-Method Researcher | 2019 – 2022

- Led multi-site study on racial and gender disparities in primary care and reproductive health, collaborating with clinicians and academic investigators to translate research into actionable policy recommendations.
- Managed IRB submissions, recruitment, and regulatory compliance for multi-site projects at the regional and national level for several Women's Health initiatives.
- Mapped hospital billing codes (ICD-9 and ICD-10) for medical treatment, outcomes, and complications of the diagnosis, management, imaging, and treatment of Uterine Fibroids for longitudinal analysis.
- Conducted qualitative interviews with Black and white veterans who were diagnosis with uterine fibroids to understand their experiencing from prior to diagnosis, diagnosis, and treatment. Lead group analysis of both quantitative and qualitative datasets of a cohort of Black and white veterans who received treatment for uterine fibroids during the 2000s, and the smaller cohort of veterans semi-structured interviews using STATA and Atlas.ti. I ultimately lead as key contributor to a number of project related peer-reviewed publications as lead and co-author.
- Yearly I oversaw project and team related budgets, timelines, and reporting for national research initiatives in Women's Health to improve racial equity among Veterans.

University of Washington | Public Behavioral Health and Justice Policy – Seattle, WA | Project Lead / Research Coordinator | 2015 – 2017

- Assisted in the work for HB 1088 and disseminating and implementing evidence-based practices (EBPs) in child and adolescent mental health programs for Washington State.
- Programmatic evaluation and technical assistance include a public health mental health model for parents and substance abuse (Triple P Program).
- Coordinated numerous extensive multi-day training sessions for clinicians and county contractors in EBPS, administering pre/post surveys for evaluation and publication.
- Led tablet programming for EHR with two hospital systems for a clinic screening tool for a public health initiative on improving parenting skills.
- Coordinated and facilitated stakeholder meetings and managed all program activities related to a WA state-funded bill, including manuscript and report writing.
- Scripted and designed a state Reporting Guide on best practices for documenting use of EBPS with an accompanying animation video for state-level clinicians.
