Education

University of Washington, Seattle, WA

Master of Public Health (MPH), 2019

Certificate in Demography, Center for Studies in Demography and Ecology, 2019

Bachelors of Science (BS - Department of Psychology); 2013

Bachelors of Art (BA - Interdisciplinary of Visual Arts); 2013

Professional Experience

King County Regional Homelessness Authority – Seattle, WA | Senior Evaluation and Analytics Coordinator | Aug 2022 – Present

- Led the 2026 Point-in-Time (PIT) Count using a novel Respondent-Driven Sampling (RDS) methodology for unsheltered homelessness enumeration. Served as project planner, community liaison, database developer, analyst, and research coordinator. Managed research site planning and logistics, volunteer recruitment and supervision, and development of key project materials, including IRB documentation, MOUs, DSAs, manuals, and public-facing reports. Designed agency-specific analysis plans and reporting guidelines for white papers, research articles, community reports, and policy documentation.
- Provide technical assistance and methodological consultation to government agencies, Continuums of Care (CoCs), and nonprofit organizations on database design, ETL processes, and secure data management practices to support high-quality research products while minimizing data exposure risks. Facilitate weekly supervision meetings with research partners focused on homelessness systems evaluation and lead monthly coaching calls with CoCs nationwide on PIT Count methodology implementation. Improved project infrastructure by transitioning data collection from Qualtrics and Microsoft tools to a Google-based survey platform.
- Translate complex research methodologies into operational guidance for internal and external stakeholders, including Coordinated Entry systems and Veteran By Name List initiatives. Conduct data requests and program analyses for service providers serving youth and young adults, single adults, and families experiencing homelessness. Support leadership in addressing complex housing and homelessness issues through collaboration with policymakers, community organizations, and individuals with lived experience of homelessness.
- Develop and facilitate trainings on qualitative methods, program evaluation, data collection protocols, and research ethics for staff, volunteers, and community partners. Emphasize the relationship between government systems, trauma-informed approaches, and policy change through data and testimony. Trained the Ombuds team in qualitative analysis methods to independently and ethically analyze sensitive client data.

- Lead the scoping, design, development, and testing of data products, including public dashboards, reports, and mixed-method evaluations assessing system and program performance. Produce geospatial analyses and operational mapping products using QGIS, R, and Tableau to support outreach coordination and strategic planning.

Department of Veterans Affairs | Women's Health – Seattle, WA | Project Manager/Mixed-Method Researcher | 2019 – 2022

- Led multi-site studies examining racial and gender disparities in primary care and reproductive health, collaborating with clinicians and academic investigators to translate research findings into actionable policy recommendations.
- Managed IRB submissions, participant recruitment, and regulatory compliance for regional and national Women's Health research initiatives.
- Mapped ICD-9 and ICD-10 billing codes related to the diagnosis, imaging, management, and treatment of uterine fibroids for longitudinal analyses of treatment outcomes and complications.
- Conducted qualitative interviews with Black and White Veterans diagnosed with uterine fibroids to better understand experiences before diagnosis, during treatment decision-making, and throughout care. Led collaborative analyses of quantitative and qualitative datasets using STATA and Atlas.ti, including cohort analyses and semi-structured interview data. Served as a lead and contributing author on multiple peer-reviewed publications.
- Oversaw annual project budgets, timelines, and reporting requirements for national Women's Health research initiatives focused on advancing racial equity among Veterans.

University of Washington | Public Behavioral Health and Justice Policy – Seattle, WA | Project Lead / Research Coordinator | 2015 – 2017

- Supported implementation efforts related to HB 1088 and dissemination of evidence-based practices (EBPs) in child and adolescent mental health programs across Washington State.
- Conducted program evaluation and provided technical assistance for public health mental health initiatives, including the Triple P parenting and substance use intervention model.
- Coordinated multiple large-scale, multi-day trainings for clinicians and county contractors on EBPs, including administration of pre- and post-surveys for evaluation and publication purposes.
- Led tablet programming integration with two hospital systems to support electronic health record (EHR)-based clinic screening tools for a statewide public health initiative focused on parenting support.
- Coordinated and facilitated stakeholder meetings and managed project activities related to a Washington State-funded initiative, including manuscript preparation and report writing.
- Developed and scripted a statewide Reporting Guide outlining best practices for documenting EBPs, accompanied by an animated training video for state-level clinicians.
